FlowState

A real-time, shared environment for collaborative productivity and deep focus.

The Vision

Modern studying is often isolated and distracting. FlowState bridges the gap between solo productivity and social connection.

Goal: Create a digital "third space" that encourages accountability through visual presence.

CREATIVE ROOTS

Inspiration: Virtual Cottage

Study

60 Minutes to go

The Technical Pillars

Real Auth

Firebase-backed security
for data persistence
across any device.

State Logic

BLoC pattern for
predictable, complex
timer transitions.

Real-time

WebSockets on Render for
sub-second
synchronization.

Real Authentication

FIREBASE AUTH

Secure & Persistent

Moving beyond anonymous sessions to allow users to access their focus history and profile from any hardware.

- Cross-device data synchronization.
- Unique User Identifiers (UID).
- Email/Password credential management.

State Management

The Timer Engine

Using the Business Logic Component (BLoC) pattern to decouple UI from the Pomodoro logic.

Ensures the countdown remains accurate even during network jitter or background transitions.

WEBSOCKETS

The Server

Hosted on **Render**, our Node.js WebSocket server acts as the source of truth,
synchronizing study phases across all connected participants instantly.

The User Journey

Authentication	The Lobby	Syncing	Focus
Secure login/sign-up via Firebase.	Enter the lobby to Host or Join.	Gets in-sync with the other users	Deep work in the study room.

Future Roadmap

Leaderboards

Global and Friend-specific rankings based on total hours of deep work logged. Gamifying productivity.

Social System

Persistent Friend Lists to quickly see who is online and instantly invite them to private study rooms.

Lo-Fi Radio

Built-in curated study beats and support for custom, user-inputted audio queues to maintain the vibe.

FLOWSTATE TEAM

That's it
